Re: KJMQ (FM), Lihue, Hawaii
Facility Identification Number: 49898
Hochman Hawaii Four, Inc.
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed June 14, 2011, on behalf of Hochman Hawaii Four, Inc. ("HHFI"). HHFI requests further extension of the special temporary authority ("STA") granted on December 3, 2009, to operate Station KJMQ with temporary facilities.¹ In support of the request, HHFI states that installation of newly authorized, modified facilities for KJMQ has been delayed by adverse weather conditions, the inaccessibility of the site and the resignation of the stations' full-time engineer. HHFI requests additional time to broadcast at reduced power until the site work and transmitter installation can be completed.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

¹ KJMQ is licensed for operation on Channel 251C1 (98.1 MHz) with effective radiated power ("ERP") of 51 kW (H&V) and antenna height above average terrain ("HAAT") of 4 meters. Construction Permit BPH-20090928AJT authorizes relocation of the transmitter and operation with ERP of 4 kW and HAAT of 518 meters.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KJMQ may continue to operate from the site authorized by Construction Permit BPH-20090928AJT, employing a temporary antenna with antenna height and effective radiated power less than the permit values. HHFI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **February 4, 2012**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.
